Over the past 5 years, interest in concept-based curriculum has surged among nurse educators. This interest is developing in the fields of microbiology, hematology, immunology and clinical biochemistry. Faculty specializing in these areas are focusing on the study of immune systems in all organisms. Recovered from a previous bout of the disease, individuals could nurse the sick without contracting the illness a second time. This phenomenon, which was observed early on, developed into scientific theory. NCLEX RN - MedSurg - Hematology & Immunology - Question 50111 BehavioralPsychosocial Hematology Immunology Professional Caring and a. b. c. PROGRESSIVE CARE NURSING: GENERAL CONCEPTS Nursing The
